

Excelerate Mobile App – Week 1 Submission

Student Information

Name: Zolani Mjikeliso

GitHub Repository: <https://github.com/4THComing/excelerate-mobile-app>

1. App Proposal

Purpose

The purpose of this application is to provide learners and administrators within the Excelerate ecosystem with a centralized mobile platform for program discovery, learning content access, event engagement, announcements, and feedback collection.

The application aims to improve communication, accessibility, and engagement between learners and administrators through a modern cross-platform mobile experience built using Flutter.

Target Users

Learners

- Browse available programs
- View program details
- Register for events
- Access learning content
- Submit feedback
- Receive announcements

Administrators

- Publish announcements
- Manage programs
- Review user feedback
- Monitor participation and engagement

Key Features

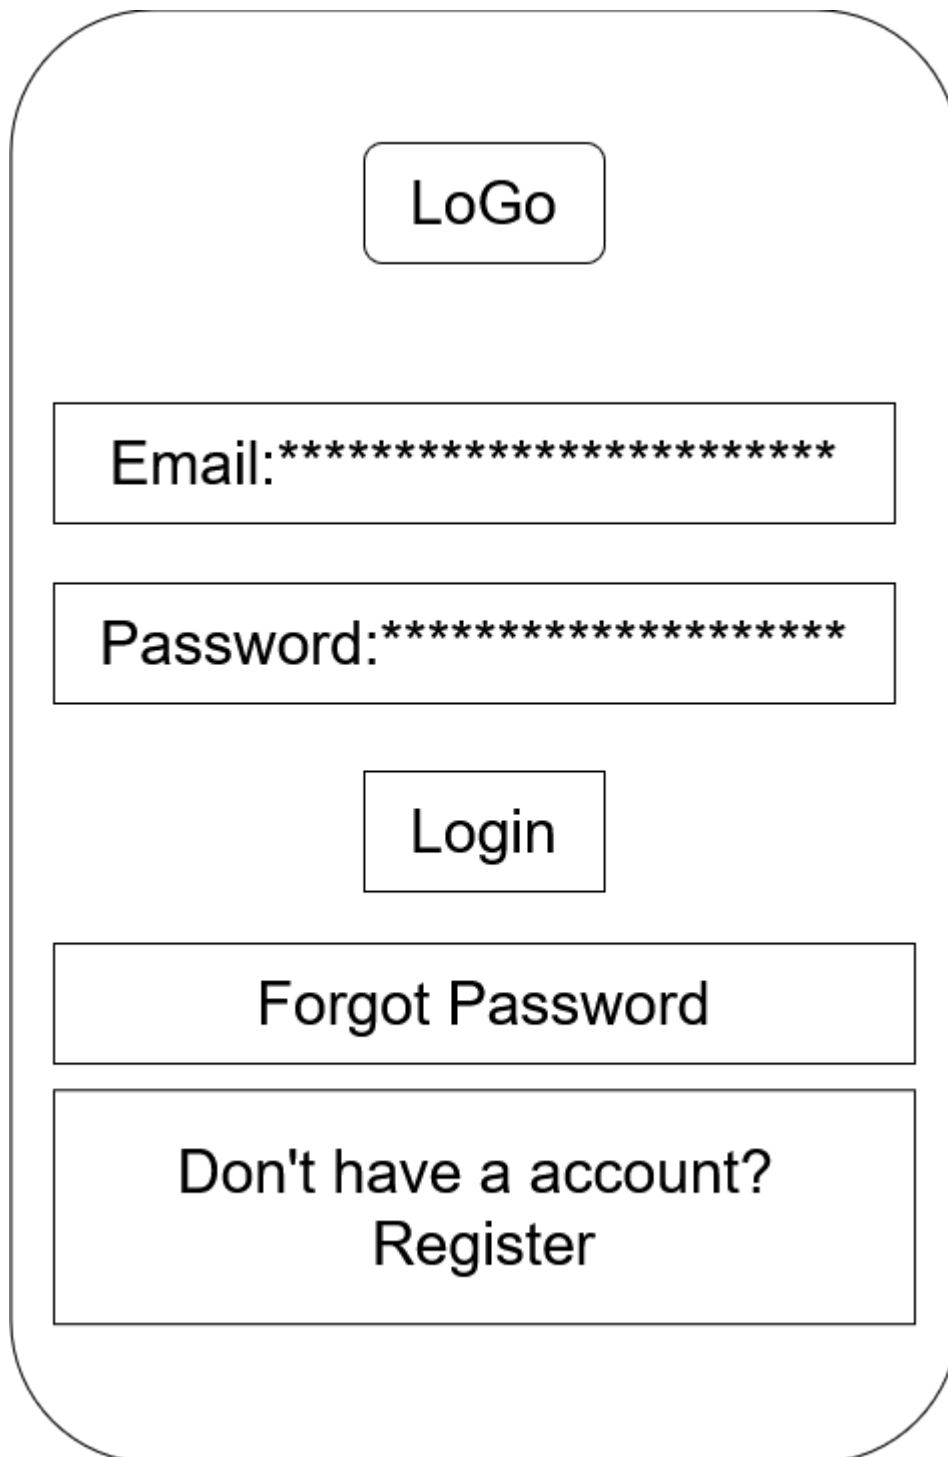

- User Authentication (Login)
- Home Dashboard
- Program Listing
- Program Details
- User Profile
- Feedback Submission
- Announcements & Notifications

User Journey Example

A learner opens the application and logs into their account. From the Home Dashboard they see a new workshop announcement. They navigate to the Program Listing screen, select the workshop, view details, and register. After attending the event, they submit feedback using the Feedback Form. Administrators can review this feedback and use it to improve future events.

2. Wireframes

Login Screen

The wireframe shows a login screen with a rounded rectangular container. At the top center is a button labeled "LoGo". Below it are two input fields: the first is labeled "Email:" followed by a series of asterisks, and the second is labeled "Password:" followed by a series of asterisks. Below the password field is a button labeled "Login". At the bottom, there are two more buttons: "Forgot Password" and "Don't have a account? Register".

Profile Screen

A user profile interface mockup within a rounded rectangle. At the top is a 'Profile' header box. Below it is an 'Avatar' oval. Then are two stacked boxes for 'Name : User' and 'Email : *****'. Below these are three stacked boxes for 'My Programs', 'Settings', and 'Logout'. At the bottom are three ovals for 'Home', 'Programs', and 'Feedback'.

3. GitHub Repository Setup

Repository Link:

<https://github.com/4THComing/excelerate-mobile-app>

The screenshot shows a web browser window displaying the GitHub profile of a user named '4THComing'. The browser's address bar shows the URL 'github.com/4THComing'. The profile page features a large circular avatar with a green pixelated cross design. Below the avatar, the username '4THComing' is displayed, along with an 'Edit profile' button. To the right of the profile information, a section titled 'Popular repositories' lists five public repositories:

- zols-console-expense-tracker**: a C# console application to track personal expenses. (C#, 1 star)
- AuthSystem**: Console-based C# authentication system demonstrating user registration, secure password hashing, login validation, and session-based access control using clean architecture principles. (C#)
- InventoryManagementSystem**: Intermediate C# console application with JSON persistence. (C#)
- PurchaseOrderSystem**: Console-based Purchase Order Management System built in C# demonstrating SAP-style business workflows, status-driven validation, and clean separation of concerns. (C#)
- excelerate-mobile-app**: Cross-platform mobile application developed using Flutter for the Excelerate Internship Program. (C++)

The browser's taskbar at the bottom shows various application icons, including VS Code, Google Docs, and a search bar. The system clock in the bottom right corner indicates the time is 11:17 on 2026/06/08.

Evidence of Version Control

The screenshot displays the GitHub repository page for `4THComing/excelerate-mobile-app`, specifically the `commits/main/` view. The interface is in dark mode. The top navigation bar includes links for Code, Issues, Pull requests, Agents, Actions, Projects, Wiki, Security and quality, Insights, and Settings. The commit history is filtered by the `main` branch and shows commits from June 7, 2026.

Commits on Jun 7, 2026

Commit Message	Author	Time	SHA-1	Verified
Added App Proposal	4THComing	committed 13 hours ago	360b13e	
Resolve README merge conflict	4THComing	committed 13 hours ago	b8b266e	
Initial Flutter project setup	4THComing	committed 13 hours ago	93f094b	
Add README for wireframes documentation	4THComing	authored 13 hours ago	b44cd96	Verified
Add initial draft of Team Charter	4THComing	authored 13 hours ago	8e42fbd	Verified

The bottom section of the screenshot shows a scroll-down view of the commit history, including additional commits:

Repository Structure

The screenshot shows a GitHub repository page for 'excelsrate-mobile-app' by user '4THComing'. The repository is public and has 0 stars, 0 forks, and 0 watchers. The main branch is 'main' with 1 branch and 0 tags. The repository contains 13 files and folders, all of which were last committed 13 hours ago. The files include 'android', 'docs', 'ios', 'lib', 'linux', 'macos', 'test', 'web', 'windows', '.gitignore', '.metadata', 'README.md', 'analysis_options.yaml', 'pubspec.lock', and 'pubspec.yaml'. The 'docs' folder contains a file named 'Added App Proposal'. The 'README.md' file has a commit message 'Resolve README merge conflict'. The 'analysis_options.yaml' file has a commit message 'Initial Flutter project setup'. The 'pubspec.lock' and 'pubspec.yaml' files also have a commit message 'Initial Flutter project setup'. The repository is described as a 'Cross-platform mobile application developed using Flutter for the Excelsrate Internship Program.' The page also shows the 'About' section with links to the README, Activity, Stars, Watching, and Forks. The 'Releases' section shows no releases published with a link to 'Create a new release'. The 'Packages' section shows no packages published with a link to 'Publish your first package'. The 'Contributors' section shows 1 contributor, '4THComing'. The 'Languages' section shows a bar chart of the repository's language composition: C++ 45.0%, Dart 10.5%, HTML 2.7%, Other 0.3%, CMake 35.2%, Swift 3.6%, and C 2.7%.

4. Flutter Installation Evidence

Flutter Doctor

Conclusion

Week 1 objectives were successfully completed. Flutter was installed and configured, wireframes were created, the application proposal was documented, and the GitHub repository was initialized with version control enabled.
